Security

The SystmOnline service has been developed, tested and accredited by a government body called NHS Connecting for Health. All personal information used by SystmOnline is secure and protected. It is only available to staff at your practice that have the appropriate security controls, i.e. those managing appointments, repeat prescribing and patient registration.

We regard all your online information as confidential information so we want to safeguard you by asking that everyone who registers for SystmOnline brings along some form of identification before we issue your username and password. If you are housebound please contact the surgery.

In addition, if you agree to register for online consultations, you agree to have your photograph taken at the practice and stored by the practice in order to verify your likeness during online consultations.

Online consultations will be treated, recorded and processed the same way as face to face consultations.

The purpose of storing your NHS No. and Skype ID is to make it easy for the clinicians to quickly identify your Skype ID out of many other registered patients for video consultation.
